

THE AGENT STARTER STACK

Before you hire a VA, hand these three tasks to AI agents. What each replaces, the tools, and the one rule that keeps it safe.

01 THE INBOX AGENT

Replaces: email triage hours. Reads, sorts, flags opportunities, drafts replies in your voice. Setup: about 2 hours with Claude plus your Gmail.

02 THE COMMENTS AGENT

Replaces: answering the same DM 50 times. Keyword comment triggers a public reply plus a DM with your link or doc. Setup: about 1 hour in a tool like Zernio or ManyChat.

03 THE REPORTS AGENT

Replaces: the weekly numbers scramble. Pulls your stats into one page you read with coffee. Setup: one evening, then it runs forever.

THE RULE THAT MAKES IT SAFE

Agents **draft**. You **approve**.
Nothing sends, posts, or replies without your yes, until YOU decide to let go.
A VA needs management. An agent needs a rule.

DO THE MATH

A VA: \$500+/mo. These three agents:
roughly \$0 to \$40/mo in API costs.

START WITH ONE

The inbox agent is the fastest win. Feel
the difference in 48 hours.

VAS STILL MATTER

For judgment and taste. Stop paying
them to sort email.
