

THE GROWTH STUDIO BLUEPRINT

One dashboard where AI agents run your whole content funnel. Find what people search, arm every post with a DM funnel, track every click to your community. This is the exact system from the reel.

01 FIND DEMAND STEP 1

A free **trend agent** scrapes what your audience actually searches on Google, YouTube and TikTok. You never guess a topic again. Make content for phrases people already type.

02 ARM THE FUNNEL STEP 2

Every post gets a **comment keyword** (like SYSTEM). Comment lands, the agent DMs your guide and community link automatically. Zernio or ManyChat both work, free tiers are fine.

03 TRACK TO MONEY STEP 3

One dashboard joins it all. **Comments, DMs, clicks, members**, live per post. You see which content pulls people to your offer and double down on it.

ASK CLAUDE CODE TO BUILD YOURS • COPY PASTE

```
> Build me a growth dashboard: pull my comment-automation
> stats from the Zernio API, join them with my content
> calendar, and show comments to DMs to clicks per post.
```

TIP 01

Works in ANY niche: fitness, real estate, e-commerce. Swap the keyword and the lead magnet.

TIP 02

Start with one funnel on your best post. My first one turned 258 comments into 75 link clicks.

TIP 03

You do not need to code. Claude Code builds it, you just describe what you want.
